

EKU FORTE PULL OUT RUNNERS

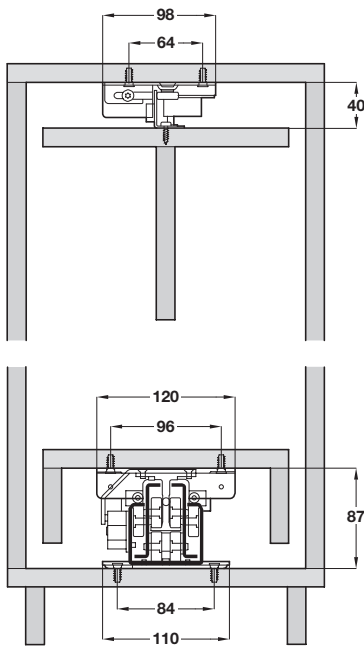

Base mounting pull out runners to create bespoke larder units with wooden shelves and without any visible fittings, allowing the cabinet maker an infinite number of options when designing pull out cabinets or larder units for the kitchen or other living spaces in the home.

- > Anodised aluminium panels (48 mm high) are also available to clip onto sides of shelves for additional bespoke design possibilities - see photograph above
- > Can be used to create pull outs under sloping ceilings and under stairs
- > Soft closing also available - ensures that the unit closes quietly and glides into its end position gently and almost inaudibly - soft closing set is optional but is also quick and easy to retrofit

Sets consist of runners only - Cabinet, shelves and doors are not included
