PROFESSIONAL INSTALLATION

- !** > Due to the seamless nature of Edge sinks, they need to be fitted into a compatible worktop surface by a specialist fabricator, using our range of expert tools shown on pages **16-17**.
- > The procedures for installing Edge are the same that fabricators use everyday when working with solid surfaces
 - > Edge eliminates all colour matching (batch number) issues associated with solid surface side sinks
 - > Edge eliminates long manufacturing lead times, associated with solid surface sided sinks.
 - > Edge is ready to be installed out of the box.
 - > Edge is completely seamless; Solid surface, sided sinks still have a soft sealant joint where the solid surface meets the steel bottom
 - > Disclaimer: Häfele UK do not take responsibility for any damage caused by incorrectly fitted products - full installation guides and DXF files can be found at www.edgesinks.eu
