## Grass Nova Pro child lock

Assembly of the stop on the cabinet member

Position it flush with the front panel and screw to the drawer bottom panel

Activated - rear position of the sliding lock

Deactivated - front position of the sliding lock

Position it flush with the front panel and screw to the drawer bottom panel

- > Concealed assembly prevents child from copying drawer operation
- > Unhindered use of storage space in the drawer - the child lock is fitted on the right of the drawer base
- > No damage to the front and cabinet
- > Can also be retrofitted
- > Tool-free deactivation if necessary
- > Can be used with all Nova Pro add-on systems - as is mounted underneath the drawer
- > Fitting instructions included
- > Order qty: 1 pc

- > Can only be used with Nova Pro with liquid damper
- > Cannot be used in combination with Tipmatic soft-close

Cat. No.
Child lock
