

C7GPX8

70cm Dual Fuel Cooker with Pyrolitic Multifunction
Oven & Gas Hob, Finger Friendly Stainless Steel
Energy Rating: A

ONLY AVAILABLE FROM SELECTED DEALERS

EAN13: 8017709149031

MAIN OVEN

10 functions

- Oven capacity: gross – 79 litres, net – 70 litres
- Air cooling system
- Closed door grilling
- Easy clean enamel interior
- Metal side supports
- 5 cooking levels
- 2 lights
- Quadruple glazed removable door
- Pyrolitic cleaning function
- Roof liner
- Storage compartment beneath the oven

HOB

5 Burners:

- Front right: 1.00 kW
- Rear right: 1.80 kW
- Centre: Ultra rapid burner: 4.00kW
- Rear left: 1.80 kW
- Front left: 1.00 kW
- Heavy duty cast iron pan stands
- Safety valves
- Automatic electronic ignition
- Adaptable for LPG

STANDARD ACCESSORIES:

Partially extractable shelf set
1 x extra deep tray (40mm deep)
2 x chrome shelves
1 x grill mesh

- Nominal power: 3.00 kW
- 13 Amp power supply required

Main Oven

CIRCOCAS / FAN WITH LOWER ELEMENT:

In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

Circulaire with upper and lower elements:

The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

ECO:

The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.

Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Half grill:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Pyrolytic:

Pyrolytic cleaning at 500°C destroys all the dirt deposits inside the oven. The process can be set from 1.5 hours to 3 hours, depending on the degree of dirt build up.
