- Adaptable for LPG

STANDARD ACCESSORIES:

- 1 x extra deep tray (40mm deep)
- 1 x chrome shelf
- 1 x grill mesh

Nominal power: 3.00 kW

- 13 Amp power supply required

Functions

Main Oven

Main Oven

Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Fan:

As above but with thermostat set a '0'.

Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Snowflake:

With the switch on this symbol, no heating is possible even if the thermostat is turned.
