- Reference programme: Eco, Duration of Eco programme: 175 mins
- Energy consumption: Standby off mode: 0.02 W, Standby on mode: 0.80 W. Duration of Standby On mode: 5 mins

Functions

A+:

Smeg products with A+ or A++ energy rating are highlighted with one of the following Symbols

A:

Product energy rating, measured from A+++ to D / G depending on the product family.

10 plate settings:

The symbols show the number of plate settings of the dishwasher.

DELAY TIMER:

A delay timer can postpone the start of the programme by up to 24 hours, for convenience and also to take advantage of off-peak energy periods

TOTAL AQUASTOP:

In addition to the partial Aquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

Swing Wash System:

The Swing Wash system ensures optimum water distribution throughout 45cm dishwasher tanks to deliver excellent wash results.

FINGER-FRIENDLY STAINLESS STEEL:

The st/steel material used on the exteriors of Smeg dishwashers has a finger-friendly finish to assist in maintaining the surfaces in a pristine condition.

QUICK TIME:

The Quick Time option can be selected in conjunction with all programmes except the pre-wash in order to reduce the length of the wash cycle up to 55%. By using higher temperatures and an intense mechanical spray action, Quick Time is able to save valuable time.

FlexiZone:

The new ½ load FlexiZone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed. Traditional half loads allow only one of the baskets to be used. Flexi-Zone can be found on most dishwashers, as either an option or a programme depending on the model.

Delicate Quick:

A quick programme ideal for delicate loads.

Eco:

Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.

Normal Quick:

A quick programme ideal for loads without stubborn dirt or dried on residue.

**FLEXITABS:**

Regardless of the type of detergent used, the wash cycle adjusts to give the best possible results every time.

**AQUATEST:**

An electronic infrared sensor measures the clarity of the water during an Auto programme, and automatically ensures the minimum consumption of water and energy during the load. Models with Aquatest will have at least one Auto programme.

**Soak programme:**

The soak programme provides a rinse to prevent dirt from drying.

**RAPID 27 MINS:**

A new quick programme which takes just 27 minutes, suitable for a lightly soiled load.

**CRYSTAL:**

The crystal cycle is a particular programme designed especially for delicate dishes with light dirt.

**Eco:**

Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.

**Auto 45° - 65°:**

The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.

**Super:**

The super programme is suitable for removing stubborn dirt.

**STRONG & FAST:**

This special programme takes less than 1 hour to eliminate the most stubborn dirt and dried on residues.
