EAN13: 8017709257361

Special promotion on this model* 5 year guarantee on parts and labour if purchased by 31st December 2020. Models included are all Dolce Stil Novo built in ovens & Combi appliances. Terms and conditions apply. Offer available from selected displaying retailers only. [For full terms and conditions please click here](#)

Please ensure that you have:

Minimum router capability of 2.4 GHz

IOS 10 or higher for iPhone users or Android 5.3 or Higher

This WIFI appliance will be unable to connect without either of these capabilities

- 45cm reduced height compact oven

- 15 functions (including 5 microwave) + 1 cleaning
- **VIVOScreen MAX display**
- **56 automatic programmes**
- **64 customisable recipes**
- Other functions: Defrost by time, defrost by weight, Plate rack/warmer, Proving, Sabbath
- Other options: SmartSense system, Keep warm, Eco light
- Multistep cooking
- Microwave power: 1000 W
- Triple glazed removable door
- Child safety lock
- Soft close door
- Tilting grill
- Air cooling system
- Closed door grilling
- Vapor cleaning
- Easy clean enamel interior
- Rapid pre-heating
- Metal side supports, 3 cooking levels
- 2 x Halogen lights
- **Wi-fi connectivity via SmegConnect App**

Standard accessories:

1 x Glass tray

1 x Grill mesh

1 x Chrome shelf

1 x set of telescopic guides (Partial extraction)

- Oven GROSS capacity: 50 litres
- Oven NET capacity: 40 litres
- Usable cavity space dimensions (HxWxD): 212x462x407mm
- Nominal power: 3.10 kW
- Supply can vary depending on usage, please consult a qualified electrician for ampere requirement

NB: Please be aware that products with a copper trim will naturally discolour overtime.

Functions

Versions

- **SF4606WMCNR** - 60cm DSN Compact Combination Microwave Oven, Eclipse Black Glass with Copper Trim
- **SF4606WMCNX** - 60cm DSN Compact Combination Microwave Oven, Eclipse Black Glass with Steel Trim

Main oven

Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

Circulaire with upper and lower elements:

The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

ECO:

The combination of the grill, fan (if present) and lower element is particularly suitable for cooking small quantities of food.

Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Lower heating element only:

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

FAN WITH LOWER ELEMENT/ CIRCOGAS:

In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning. In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time.

Pizza function:

The simultaneous operation of these three elements ensures an optimum cooking facility, ideal not only for pizza but also for cookies, quiches and flans.

**Microwave:**

Penetrating straight into the food, microwaves cook very quickly and with considerable energy savings. Suitable for cooking without fat, they are also able to thaw and heat food without altering its original appearance and aroma. The microwave function can also be combined with conventional functions with all the resulting advantages. Ideal for all types of food.

**Upper and lower element + microwave + fan:**

Fan combined with traditional cooking, where heat is generated from above and below, provides uniform heat. Adding the microwave function allows the same results in less time.

**Microwave + circulaire + fan:**

Cooking with the simultaneous use of the heating element in combination with fan and microwave supply.

**Microwave + grill element:**

To achieve a combined cooking with grill that cooks the outside whilst assuring an internal cooking thanks to the microwave function.

**Regenerating reheat:**

This function allows to reheat food that has already been cooked and conserved in the fridge.

**Vapor clean**

Vapor clean
