- Front right: Ø 210mm, 2.3kW – booster 3.2kW

The two zones on the right can be combined to create one Multizone 195/392mm

Auto vent

Intuitive Slider touch control

Multizone option

Eco-heat

Eco-off

- Pause option
- 5 independent boosters (P)

14 power levels, with quick setting

- Minute minder
- End of cooking timer & alarm
- Residual heat indicator
- Auto pan recognition and adjustment to pan size
- Automatic switch off when overheat or overflow
- Child safety lock
- Nominal power 7.35kW
- Supply can vary depending on usage, please consult a qualified electrician for ampere requirement

NB: only pans with a ferrous (magnetic) base are suitable for induction hobs.

Functions

Auto vent:

Auto vent is a smart infrared system which connects the hood and the hob, automatically regulating the hood extraction speed depending on the temperature and power level selected on the hob.

Child lock:

some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Touch controls:

Easy to use touch controls allow the appliance to be programmed at the touch of a button.

Power booster:

option allows the zone to work at full power when very intense cooking is necessary.

Quick Start:

When the Quick Start function is selected, the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Timer:

All ceramic hobs have a timer which automatically ends cooking after a preset time.
