

## SYD4110IBL

110cm "Symphony" 4 cavity Cooker with 2 side opening oven doors & Induction hob, Black  
Energy rating AA

ONLY AVAILABLE FROM SELECTED DEALERS

EAN13: 8017709209582

MAIN OVEN - TOP RIGHT

- 7 functions Inc. Circulaire element with fan
- Oven capacity: gross - 68 litres, net - 63 litres
- Side opening oven door
- "Easy clean" enamel interior
- Digital electronic clock/programmer
- Air cooling system
- Closed door grilling
- Triple glazed oven door
- Roof liner
- Vapor Clean function

AUXILIARY OVEN – LOWER LEFT

- 6 functions Inc. upper and lower element with fan
- Oven capacity: gross - 68 litres, net - 63 litres
- Side opening oven door
- "Easy clean" enamel interior
- Air cooling system
- Closed door grilling
- Roof liner
- Vapor clean function

GRILL COMPARTMENT – TOP LEFT

- Oven capacity: gross - 41 litres, net - 36 litres
- "Easy clean" enamel interior
- Air cooling system
- Closed door grilling
- Fully variable grill – max grill power: 2.7kW
- Triple glazed removable door
- Roof liner

STORAGE DRAWER- LOWER RIGHT:

INDUCTION HOB

Hob:

5 Induction zones:

- Front right: 1.30 kW (booster 1.40 kW)

- Rear right: 2.30 kW (booster 3.00 kW) Ø D215 mm
- Centre: 2.30 kW (booster 3.00 kW) Ø D265 mm
- Rear left: 2.30 kW (booster 3.00 kW) Ø D215 mm
- Front left: 1.30 kW (booster 1.40 kW) Ø D175 mm
- Nominal power: 19.5 kW
- Power supply required: dedicated cooker circuit fused at 40 Amp

STANDARD ACCESSORIES:

Main oven & Auxiliary oven:  
 2 x Sets of partial extractable telescopic guides  
 2 x Extra deep tray (40mm deep)  
 2 x Grill mesh  
 4 x Chrome shelves

Grill compartment :  
 1 x Extra deep tray (40mm deep)  
 1 x Chrome shelf

Functions

							Main Oven
							Auxiliary Oven
							Grill

Versions

- **SYD4110I** - 110cm "Symphony" 4 cavity cooker with induction hob, St/steel

## Main Oven

### Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

### CIRCOGAS / FAN WITH LOWER ELEMENT:

In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

### Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

### Lower heating element only:

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

### Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

### Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

**Vapor clean**  
Vapor clean

## Auxiliary Oven

### Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

### CIRCOGAS / FAN WITH LOWER ELEMENT:

In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

**Upper and lower element only:**

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

---

**Lower heating element only:**

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

---

**Fan with grill element:**

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

---

**Snowflake:**

With the switch on this symbol, no heating is possible even if the thermostat is turned.

---

**Vapor clean**

Vapor clean
