MAIN OVEN - TOP RIGHT

7 cooking functions Inc Circulaire element with fan:

Oven capacity: gross - 68 litres, net - 61 litres

Side opening door

Digital electronic clock/programmer

Air cooling system

Closed door grilling

4 cooking levels

Easy clean enamel interior

Triple glazed oven door

Vapor Clean function

- Conventional: 0.85kWh
- Forced air convection: 0.95kWh

AUXILIARY OVEN – LOWER LEFT

6 cooking functions Inc Top & Lower element with fan:

Oven capacity: gross - 68 litres, net - 61 litres

Side opening door

Air cooling system

Closed door grilling

4 cooking levels

Easy clean enamel interior

Triple glazed oven door

Roof liner

- Conventional: 0.85kWh
- Forced air convection: 0.95kWh

GRILL COMPARTMENT – TOP LEFT

Oven capacity: gross - 41 litres, net - 36 litres

Air cooling system

Closed door grilling

Fully variable grill – max grill power:2.7kW

2 grilling levels

Double glazed door

Roof liner

STORAGE DRAWER- LOWER RIGHT

HOB:

7 gas burners

Front Right: 1.80kW

Rear Right: 1.80kW

Front Centre: 3.00kW

Rear Centre : 1.00kW

Front Left: 1.00kW

Rear Left: 3.00kW

Far Left: Ultra rapid burner: 4.20kW

Heavy duty cast iron pan stands

Automatic electronic ignition

Safety valves

Adaptable for LPG

- Nominal power: 8.4 kW
- Power supply required: dedicated cooker circuit fused at 30Amp

STANDARD ACCESSORIES:

Main oven: 40mm deep tray, grill mesh, chrome shelf, telescopic shelf set (partial)

Auxiliary oven: 40mm deep tray, grill mesh, chrome shelf.

Grill oven: 20mm deep tray, grill mesh, chrome shelf, telescopic shelf set (partial)

Functions

Main Oven

Eco Circulaire:

 Some models have Eco Circulaire in place of Circulaire but the 2 functions work in the same way. This is the most energy efficient standard oven function for the cooker.

CIRCOGAS / FAN WITH LOWER ELEMENT:

In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

Lower heating element only:

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Vapor clean
Vapor clean

Auxiliary Oven

Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

CIRCOGAS / FAN WITH LOWER ELEMENT:

In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

**Upper and lower element only:**

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

**Lower heating element only:**

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

**Fan with grill element:**

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

**Snowflake:**

With the switch on this symbol, no heating is possible even if the thermostat is turned.

Grill

**Grill element:**

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.
