

Accuride 0116 ball carriage

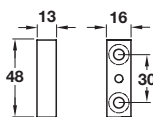

- > Bearing: With stainless steel balls or polymer balls (grease-free and smooth running)
- > Order qty: 1 pc
- > **Installation:** The balls are inserted loosely into the re-circulating ball carriage therefore it is supplied packed in a plastic envelope. In order to avoid losing balls during the installation of the re-circulating ball carriage, the plastic envelope must be pressed against the aluminium track and the re-circulating ball carriage must be slid carefully into the aluminium track. Finally install end stops

Bearing	Cat. No.
With stainless steel ball bearing carriage	421.59.811
With polymer ball bearing carriage	421.59.812
