

# SYMO 3000 CYLINDER CORES WITH PIN TUMBLERS

Symo 3000 cylinder cores can be installed, repositioned or replaced quickly without tools, simply by using the removal key

## Inserting the cylinder core

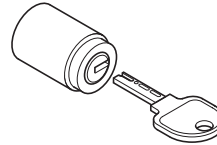

Remove protective cap from cylinder housing

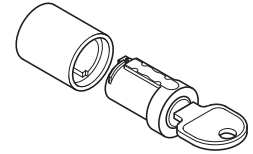

Insert the cylinder core into the cylinder housing and exert light pressure until cylinder core snaps into place

## Removing the cylinder core

The cylinder core can only be removed from the cylinder housing by using the removal key (removal key can only be used in unlocked position)

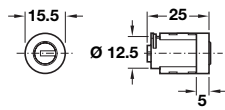

Insert the removal key into the cylinder housing and withdraw under slight pressure

8

Cabinet Locks, Catches and Bolts: Locks

### Cylinder core

- > Cylinder core for left or right hand use
- > 6 pairs of pin tumblers = 10,000 possible key changes
- > Nickel-plated zinc alloy housing, brass pin tumblers
- > Accessories: 1x key
- > Order qty: 1 pc

For master and general master key systems:  
If the master key/general master key cylinder cores are opened or locked with the master key/general master keys, they must also be re-locked or re-opened with the same key in order to restore the single key function which will otherwise be lost
