

EXTENDING ROD GUIDES

Extending rod locks are a traditional method of securing tall doors with rods. Particularly suitable for folding doors, locking directly into the tracks. Normally for inset doors.

- > Lock handles can be fixed directly into the lock or a rosette with adaptor can be used

- > Cutting information:
Maximum rod dimensions:
Lower rod length
= bottom to centre of lock case minus 16.5 mm
Upper rod length
= top to centre of lock case minus 16.5 mm

- > Normally used for inset doors
- > For overlay doors, a cranked rod will be required: Cranked rods have to be specially ordered, minimum order quantity 500 pairs
