

METIS® SOLID SURFACE

Metis® 15 mm solid surfaces are ultra thin, perfectly designed to offer style and efficiency in the kitchen. Affordable and on-trend slimline design statements can be achieved easily without the need for bespoke templating.

- > 8 standard colours
- > 15 mm solid surface
- > Square 1 mm factory finished edges as standard
- > Pre-fabricated, ready to fit, quicker to fit saving time and money
- > Sweeping curves can easily be cut and finished on-site
- > Seamless joints for a continuous finish using the tried and tested method
- > Joining kit must be ordered separately for each required joint
- > FIRA gold award for product excellence
- > 10 year limited manufacturer's warranty (warranty card included with the worktops or online registration form must be completed and returned to the supplier to validate warranty)
- > Prices include delivery to a UK mainland trade address

> Metis® has been developed to be used in the domestic environment, particularly the kitchen. Although no 'special' maintenance is needed we recommend the following is adhered to, as prevention is always better than cure

Routine cleaning:

- > Specialist cleaning regimes are not required – most dirt and light residue will easily wipe away with a damp cloth and soapy water. The work surface should then be rinsed with clean water and wiped dry
- > Persistent marks can be removed by using a mild-abrasive cleaner, but harsh scouring powders should be avoided. If in doubt, consult our care and maintenance guide

Heat:

- > Metis® surfaces will withstand heat better than many alternative surface materials
- > All hot pots, pans and other heat generating devices should always be placed upon a trivet or worktop protector rods, to prevent extreme heat having prolonged and direct contact with the surface
- > Boiling water and cooking splashes do not harm the surface

Staining:

- > Unlike marble and granite, Metis® will resist most household chemicals including alcohol and cosmetics
- > Some chemicals and strong dyes can cause damage and discolouration. If spillage occurs wipe off immediately and rinse area thoroughly

Minor scratching:

- > Kitchen utensils and crockery (particularly the unglazed bases) can sometimes cause scratches that will be particularly evident on darker colours
- > The surface can be damaged by scratching or cutting with knives, so the use of a cutting board is essential
- > Any minor scratches can easily be removed using a grey abrasive pad and other items from the care kit, please refer to the care and maintenance guide

Installation:

- > Installation is relatively easy, for either a competent DIY enthusiast or recognised kitchen installer to carry out
- > No specialist tooling required. Can be cut using standard woodworking tools and equipment
- > As with other slimline surfaces, consideration may be needed with some hobs where the hob depth affects the use of cabinets and drawers beneath
- > Use of a built in oven beneath a hob may require adaptation to the cabinet in order to allow sufficient clearance between appliances
- > Jointing kit (order separately) includes
 - 1x 75ml adhesive sachet
 - 2x isopropyl alcohol wipes
 - 6x mdf blocks
 - 3 grades of sandpaper
 - 1x grey abrasive pad
 - 1x care and installation leaflet

Metis® care kit:

- > To help maintain your Metis work surface, a care kit is available. This kit contains all that you need to make minor repairs to the surface and a special cleaner that helps to maintain, protect and build up a lustre particularly on darker colours
