

XTRAHAND™ DUST EXTRACTION TOOL FOR POWER TOOLS

The XtraHand™ is simple to use and creates almost 8lbs of surface suction and will stick to almost any surface, it works on laminated surfaces, wood, metal, plastic, plastered and painted walls, bricks concrete, celcon blocks, it even works on ceilings.

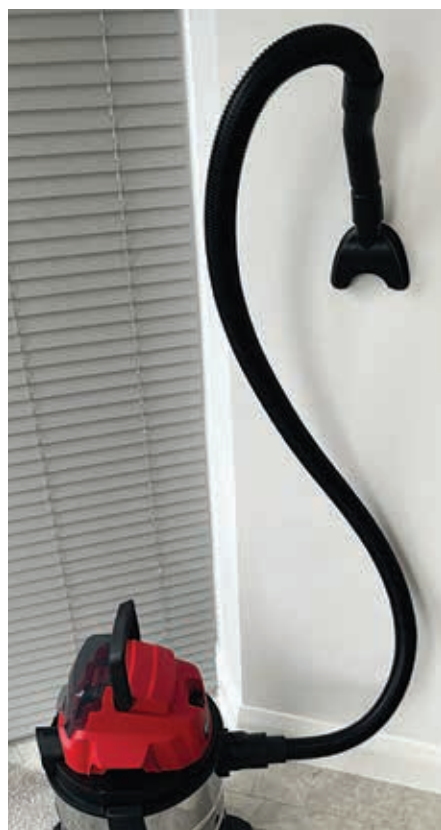

- > Perfect for DIY and Professional use
- > Effectively removes dust and debris from drilling
- > Minimises dangerous airborne particles following Health and Safety guidelines
- > The internal design creates increased velocity of suction to the mouth of the tool
- > Works with all corded and cordless type H, L and M rated hose mounted vacuums
- > Safely contains water leaks, when used with the correct wet vacuum
