

HANDLE AND KNOB JIGS

Simple jigs which accurately marks out door and drawer fronts in preparation for fixing handles and knobs.

3

Hand Tools & Jigs

Step 1
Firstly, determine the distance from the top of the door where the first hole is required

Step 2
Then determine the distance from the side of the door where the first hole is required

Step 3
Using either a 2 mm pilot drill bit or an awl, mark the door where the first hole is required

Step 4
For a standard hole centre, simply read off the scale the desired hole centres and mark the door with the position of the second hole

Step 5
The jig is now set up for all doors in the kitchen and each door can quickly be marked out ready for drilling
