

- > Perfect sealing of the drill hole without any sealing compound.
- > Watertightness approved according to ETAG 022 and DIN 18534 up to water exposure class W3-I. In any case, please take note of the general national regulations on the use of plugs in wet areas.
- > Quick and easy assembly by simply hammering in the plug.
- > Suitable for all building materials.
- > High load values due to the 2-component material.

Fischer DuoSeal

- > The DuoSeal completely seals drill holes in tiles without additional sealing compound and thus prevents structural damage caused by moisture in the building material.
- > The DuoSeal is ideally suited for tiled surfaces which are exposed to very frequent splashing water and temporarily accumulated water.
- > The universal plug can be installed gently on tiles with very little effort.
- > It's red component ensures a secure hold in all building materials. Thus, the DuoSeal achieves the same load values as conventional nylon plugs.
- > The stainless steel screw included in the set is ideally suited for installation in wet areas and avoids rusting.
- > The soft plastic rim closes the drill hole completely and flexibly adapts to the shape of the attachment part.

Length	Drill Ø	Min. panel thickness	Cat. No.	Order Qty
60 mm	6 mm	22 mm	051.80.196	50
70 mm	8 mm	25 mm	051.80.197	25
