

Concealed shelf support with spring, plug in, for Ø 5 mm holes

- > Slots into the shelf, edge boring required
- > Consists of a plastic sleeve with a spring inside, which clicks the zinc alloy pin in and out
- > Installing the shelf is easy due to the intentional leeway of the smooth pin heads, which slot into position without damaging the holes, even off-line holes
- > Easy shelf repositioning; just pull back the self-locking clips, to click the pins out of the holes
- > For min. 16 mm shelf thickness
- > For Ø 5 mm hole
- > Plastic
- > Order qty: Multiples of 10 pcs

Finish	Cat. No.
Light grey	282.84.500

*Load carrying capacity applies to 4 shelf supports bearing an evenly distributed load. Testing was carried out according to DIN EN 14749: 2005, clause 6.3.3 "Strength of shelf supports"
