

LAMELLO INVIS Mx2 MAGNET-DRIVEN CONNECTOR

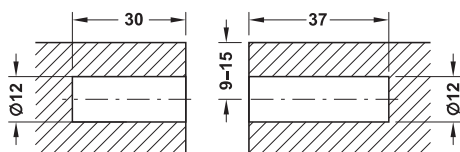

- > The connection is always detachable
- > Powerful screwed joints with up to 250 kg clamping force per connector via the M5 stainless steel screw
- > Easy handling due to the installation tolerance
- > Perfectly clamped joints without the need for clamps

Method of operation:

- > The Lamello Invis Mx2 MiniMag drive magnet is compatible with any standard cordless drill with a speed of 1,200–1,500 rpm-1
- > The rotating magnetic field of the Lamello Invis Mx2 MiniMag drives the connector, the thread on the connector screws into the internal thread of the stud
- > To undo the connection, simply reverse the rotating direction of the power drill

Lamello Invis Mx2 connector
