

TWIST sockets

Socket outlet

TWIST is a power strip for living and work environments, such as the office, lounge or kitchen. With its compact design and small mounting depth, it is easily integrated into desks or kitchen worktops. Because the power cable is routed close to the housing, the mounting depth is only around 40 mm, meaning that the unit can be easily mounted above a drawer.

With various surfaces and colours, TWIST blends easily into both modern and organic interiors. An ingenious fastening mechanism: after use, simply rotate the cover and the sockets disappear underneath it.

TWIST has won numerous highly renowned design prizes including the Good Design Award 2014, the Red Dot Product Design Award 2012, the Focus Open 2014 Silver and Interior Innovation Award 2014 and lastly the Interzum Award: intelligent material & design 2015.

- > Just 40 mm mounting depth - TWIST is so compact that it is even possible to install it above drawers
- > Quick and easy to mount
- > Suitable for subsequent assembly
- > Space-saving cable guide
- > Integrated water run-off

BACHMANN TWIST power outlet

- > Area of application: Electrification unit for installation in furniture
- > Material: Cover disc: Metal, Socket: Plastic
- > Finish/colour: Cover disc: Stainless steel look, Socket: Black
- > Installation depth: 40 mm
