

MIRKA® DEROS VACUUM ORBITAL SANDER

DEROS 5650CV vacuum orbital sander

005.11.376

005.11.335/6

- > Ø125/150 mm
- > MIRKA® DEROS 5650CV (Direct Electric Random Orbital Sander) is the first ever electric sanding machine with a brushless motor.
- > Unlike it's predecessor CEROS it has no external power transformer
- > At 1.05 kg Deros is one of the lightest sanders on the market
- > Soft start function, a built in electronic motor brake and a smooth, easy to operate lever to control motor speed
- > Thanks to its high efficiency brushless motor, the MIRKA® DEROS 5650CV also has a plenty of power to get the job done quickly
- > Performance is comparable to a conventional 500W electric machine and that ensures it maintains a constant speed even under heavy load
- > The unique symmetrical design makes it just as comfortable whether it's being used in the left hand or the right hand and the longer body provides the option of a two-hand grip
- > Equipped with a new type of backing pad, which has a central air inlet. This results in improved air flow and helps extract dust away from the centre of the tool even faster
